The SSAMS suite includes the following service offering:

- SSAMS Vend
- SSAMS II
- S&S Simple Stock
- SSAMS Field ID
- SSAMS Fuel Management Systems
- SSAMS Remote Gauging

SSAMS Vend

SSAMS Vend comprises the most basic to most innovative vending solutions available in the industry today. With several SSAMS Vend systems implemented throughout the Northern United States resulting in continual cost savings, SSAMS Vend has proven to be a reliable technology that automates the day-to-day issues of consumables and issues and returns of durable tooling and safety equipment. Additionally, it provides the real-time monitoring and reporting businesses that we serve have come to rely on every day to achieve the cost savings and efficiencies they've always been seeking. SSAMS Vend On-Site 24/7 Technical Support will give you the peace of mind that you will have the right item in the right place at the right time at the Point of Use (POU) 24/7/365.

SSAMS II

SSAMS II is a suite of Tool Room Management software provided by S&S to help track the use of tools, including check-in and check-out of tools and supplies, tracking of costs, and oversight of tool and supply levels utilizing leading edge computer software with RFID and barcoding technology. We have several software options that will achieve all requirements for your Tool Room, Tool Trailer and Store Room needs. For years, SSAMS II has successfully provided a proven program

to small businesses and Fortune 500 companies throughout the industry. The SSAMS Team will be with you every step of the way to install SSAMS II and provide the on-going technical support necessary for a successful implementation at your facility.

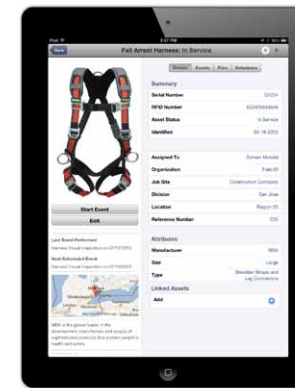

S&S Simple Stock

S&S Simple Stock is a comprehensive remote stockroom supply solution based on the most innovative and efficient program that optimizes inventory levels, increases service levels and provides the historical data we all require to make better buying decisions in the field. Sensor-based replenishment solutions automate the replenishment process of open bin environments without having to physically visit each product bin on a regular basis. Automate ordering with S&S Simple Stock mobile systems and barcode technology.

SSAMS Field ID

SSAMS Field ID is an industry leading safety compliance solution that utilizes a combination of software, handheld devices, and the Internet to automate safety compliance inspection. Field ID gives safety managers, inspectors, and executives everything they need to increase workplace safety, increase inspection and audit efficiency, and reduce liability.

SSAMS Fuel Management Systems

SSAMS Fuel Management Systems (FMS) is an integrated suite of automated fleet management products uniquely tied to medium and large organizations. SSAMS FMS is comprised of a sophisticated combination of hardware and software to automate the management of fleet-related assets across the enterprise providing exponential cost savings and 100% reconciliations with fuel deliveries and distributions for your on-site fuel pumps and fuel tanks.

SSAMS Remote Gauging

SSAMS Remote Gauging offers a non-invasive retrofit for analog and digital pressure and temperature gauges via remote monitoring. This retrofit device simply clips on to the front face of an existing gauge to capture and transmit the gauge reading. It installs in minutes and does not require the removal of the old gauge, breaking pressure seals, performing leak checks, running wires, or interrupting the underlying process. And, these devices typically cost 70% less to install than a traditional transducer. Have real-time alerts when there are alarms or leak detections with SSAMS Remote Gauging.

Integrated Leader

The S&S Asset Management Systems are truly integrated leaders in the industry. By offering an array of valuable tools and services, combined with highly skilled staff support, SSAMS can provide many one-of-a-kind solutions, including: vendor in-house built hardware and software; flexible replenishment service programs (consignment); the widest selection of purpose-built robotic vending solutions in the marketplace; and comprehensive on-site, Factory University (Advanced), and 24/7 Technical Support training programs.

S&S Asset Management Systems (SSAMS) provide complete asset control via an enterprise-class software tool that performs extensive asset management functions, such as:

- Tracks an Unlimited Number of Tools / Supplies by Stock Number, Description, Location, and Manufacturer
- Runs Usage Reports by Cost Center, Department, Employee, Contractor, Supplier and Anything Your Organization May Need with SSAMS Reporting
- Prints Barcode Labels for Easy Scanning of Tools, Supplies, and Equipment
- Prints Barcode Badges for Personnel
- Generates Standardized and Customized Reports for Predicting Current and Future Asset Needs
- Runs Multiple Reports Quickly and Easily
- S&S Technical Experts Train and Supervise the SSAMS Implementation
- Flexible Follow-Up Product Support is Available
